

PEARL PERCUSSION

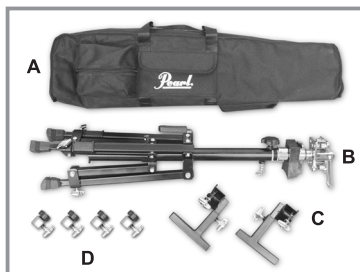

PC-1000QRS

Multi-Percussion Stand

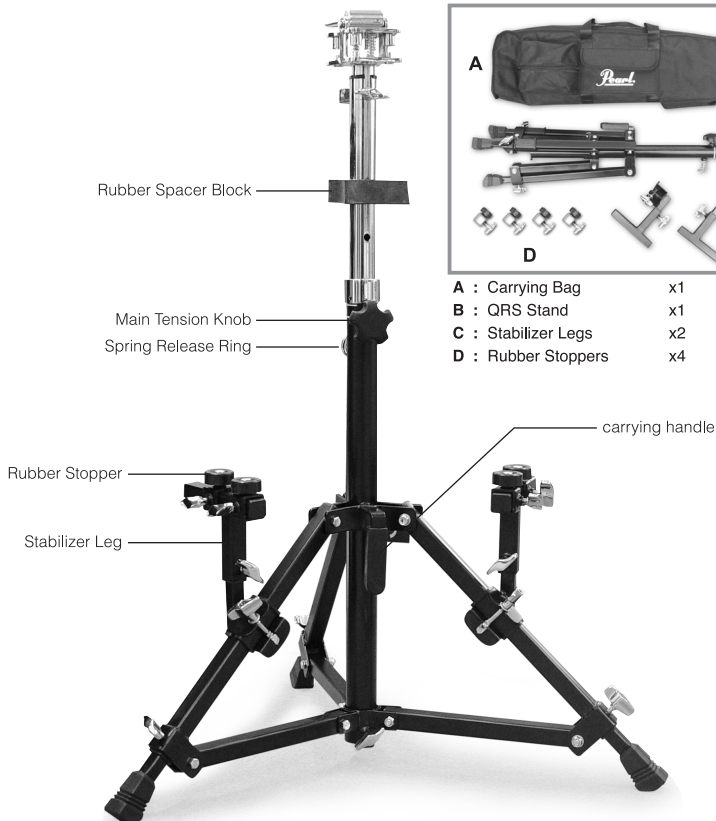

Assembly Instructions

Thank you for your purchase of the patented Pearl PC-1000QRS Stand.
Your stand package comes with the following.

■ PC-1000QRS Contents

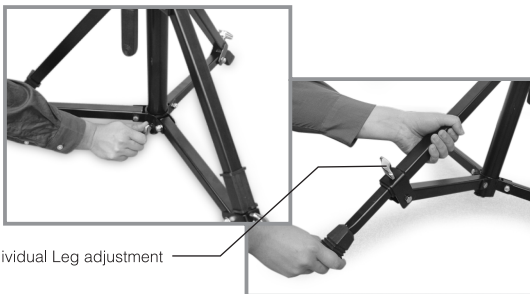

- | | |
|---------------------|----|
| A : Carrying Bag | x1 |
| B : QRS Stand | x1 |
| C : Stabilizer Legs | x2 |
| D : Rubber Stoppers | x4 |

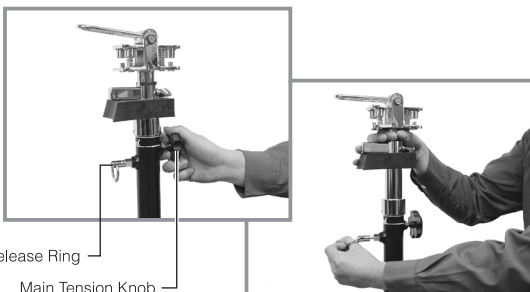

Step 1

Extend base of stand. Tighten the wing bolt at the bottom. You can angle, tilt, or fine tune the height of your QRS Stand by extending out the individual legs.

Step 2

Adjust the height of your QRS Stand by loosening the Main Tension Knob, then pull out the spring release ring. As you pull the upper tube up, the spring release ring will automatically find the next height adjustment hole. Finalize your height by tightening the Main Tension Knob.

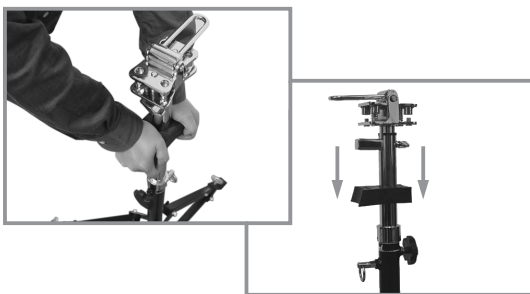

Step 3

Slide Rubber Spacer Block down 3-5 inches to mount congas (spacer block is up high for shipping purposes).

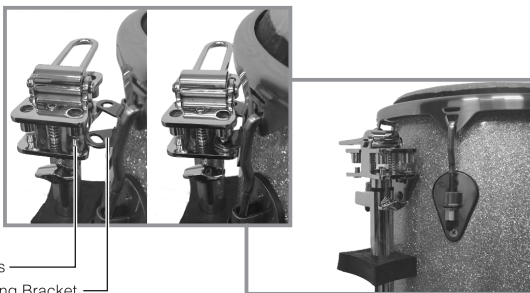

⚠ Caution

Please be mindful to use both hands for leverage when sliding the Spacer Block down.

Step 4

With the QRS Lever in the "open" position, mount congas by sliding the mounting bracket on the congas on to the matching pegs of the stand.

Step 5

After both congas are mounted pull QRS lever all the way down to lock the drums securely in place.

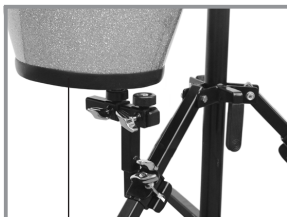

Step 6

Attach Stabilizer Legs by opening hinge and tighten over plastic sleeve.

Step 7

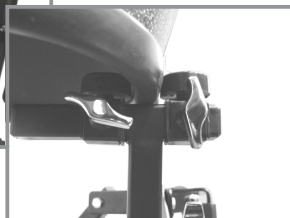

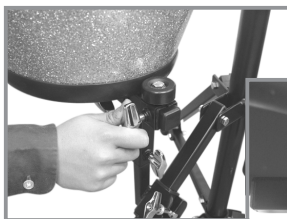

Attach Rubber Stoppers to the Stabilizer Legs, and slide the Stabilizer Legs up until it touches the bottom of the congas.

Conga Base

Step 8

Slide Rubber stoppers on each side of conga base to anchor in place.

Your congas are now locked securely in place.

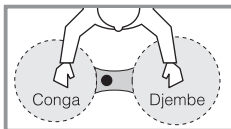

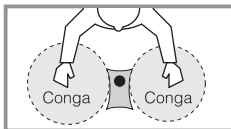

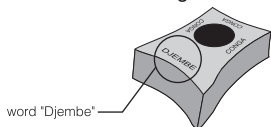

Step 9

The optional PC-1000CA/3 Caster Accessory replaces the legs with locking wheels.

Step 10

To mount a Djembe, simply follow Steps 1-8, but turn the Rubber Spacer Block so that the word "Djembe" is facing out instead of "Conga".

For Pack-up, simply lift the QRS lever to remove your drums, fold the base up and use the ergonomic carrying handle for transport, or use your carrying case (stabilizer legs can be stored in accessory pockets of case).

⚠ Caution

Please make sure that the tripod, and leg extensions are secure for transport.
