Masking Covers

The GK-90 and BBC-1 cover the holes of BT-3 and BB-3 brackets that have been removed.

GK-90

BBC-1 for BB-3, w/Gasket, Screws and Nuts
GK-90 for BT-3, inside/outside plates w/Bolts

Stainless Steel Tension Rods

Pearl's Stainless Steel Tension Rods are machined, not forged, from a single piece of stainless steel to the most exacting tolerances in the industry. They feature super-smooth, precise tensioning, with absolutely no play. Each non-plated stainless steel tension rod is matched with a precision-machined brass swivel nut for ultra-precise performance.

Practice Pads

Silencer Rubber Pads

RP-50
Our RP-50 features five rubber discs for silent practicing on drumsets with 12", 13", and 16" toms, and 14" snare drum. A universal-fit bass pad with adjustable straps is also included. They remove easily for resumption of live play.

RP-40C
Our RP-40C Cymbal Silencers effectively reduce the volume of cymbals for practicing. The set includes an 18"/20" cymbal pad, 14"/16" cymbal pad, and a pair for 14" hi-hats.

Bass Drum Pedal Training Pads

BD-10
The BD-10 bass pad is perfect for practicing at home or on the road. The wide pad accommodates double pedals and is specially formulated for extremely low noise and a realistic feel. The universal-fit "hoop" accepts all brands of pedals and adjusts to compensate for different floor surfaces. The BD-10 folds for compact transport.

Training Drum Pads

SD-50
The SD-50 features Pearl's unique rubber pad surface with realistic rebound and near silent performance. The stand and pad use heavy-duty 8mm threading for superior durability and stability.

The Pearl Difference

Pearl's Superior Shell Technology utilizes a proprietary technique for achieving the ultimate air chamber. It begins with select woods chosen for their unique acoustic attributes, milled to precise thickness with overlapping scarf joint seams for a perfect air-tight fit. The wood plies are saturated with Pearl's proprietary "AcoustiGlue" that permeates every pore and dries to the exact consistency of the wood for optimum resonance. Finally the plies are formed in high-temperature molds with 1000 PSI of hydraulic pressure to produce perfect drum shells that exhibit superior tone, optimal resonance and extreme strength.

Scarf Joints

Our Scarf Joint seams provide 800% greater surface area than conventional butt joints. This provides extreme strength and integrity to the shell while simultaneously eliminating air pockets that can disrupt vibration, so the shells vibrate uniformly for superior resonance. Other companies use butt joints where the seams are simply butted together. A butt joint works if the ends meet exactly, but often they don't and a gap is formed. Within the gap is air which is an excellent insulator. Air stops sound. For example, recording studios are built with a room within a room with air separating the two to stop sound from interfering with recordings. This is great for studios but not for drums. As drummers we want drums to vibrate freely and evenly without air pockets to impede vibration. With S.S.T., our use of scarf joints ensures no gaps and no air pockets, so the shells vibrate fully and uniformly for superior resonance.

Proprietary "AcoustiGlue"

"AcoustiGlue" is Pearl's special proprietary adhesive that hardens within the shell to the same density as the wood it binds, thus allowing the shells to respond as if they were made from a single-ply of wood. During shell formation the hydraulic mold is heated and the glue is liter-

ally boiled into the pores of the wood to ensure complete adhesion. Simultaneously, 1000 PSI is applied for thorough bonding of the plies to create the finest drum shell in the world. No other system uses this perfect combination of heat and pressure to ensure a perfect drum shell with extreme strength and tonal character. Now we have a perfect, gapless air chamber. The shell is then trimmed and the ends squared to assure overall tuning consistency and head seal.

Bearing Edges

This critical step is another key component in the quality of our shells. Our standard edges feature a 45° angled bearing edge on the inner diameter with 45° backcut over the second ply from the outside of the shell for a highly focused contact point, providing outstanding balance between attack and resonance. Our Reference drums feature rounded 45° edges on 8" to 13" toms and fully rounded edges on drums 14" and larger for more head-to-shell contact area for maximum shell vibration and resonance.

A Brilliant Finish

Finally Pearl's signature finish is applied to the drum. Pearl's painting process matches beauty with durability. Whether it's a custom Masterworks finish, designed to your exact specifications, or the 31-step super high gloss finishes found on Reference and Masters Premium - your drums will look as good as they sound for years to come.

"Hard Work and Passion...
A Little Luck... 20 Years
Together and The greatest
Drums on the planet.
Me and Pearl."

Pearl's Superior Shell Technology Assures Manufacturing Excellence. Every Time.

No inferior butt seams here. These tapered scarf joints seamlessly overlap for perfect shell resonance and consistency.

Our proprietary "AcoustiGlue" permeates the wood and hardens to the same consistency as the wood.

The scarf joints are carefully staggered upon insertion of the specially designed mold.

Extreme heat and over 1000 PSI pressure are simultaneously applied to the shell during formation.

A perfect, gapless air chamber.

The shell is then trimmed and the ends squared to assure overall tuning consistency and head seal.

Our exclusive bearing edge incorporates a 45° out and 45° in, slightly inset from the exterior, to optimize contact with the flat portion of the drum head.

Pearl's finishes are the industry state-of-the-art. Your choice of finish is encased in layers of highly durable urethane and polished to a high luster. Truly a work of art.

Omar Hakim
Studio Legend

"What's really great about Pearl is that they make all their drumsets. They don't outsource to another company. Every series is manufactured by the skilled professionals at Pearl Drums."

Pearl's Innovative Features

BRL Lug

Bridge style lugs and floor tom brackets provide maximum resonance with minimal shell contact. Pearl's revolutionary BRL lugs assure the ultimate in head seating and tuning integrity. The unique swivel function allows the tension rods to align perfectly into the lugs so there's no lateral pressure against the hoops, thus assuring maximum resonance and sustain.

STL Lug

The NEW Reference PURE features STL swivel tube lugs with minimal contact and super low-mass that allows the drums to vibrate freely for ultimate resonance. STL Lugs feature a swivel nut that keeps the tension rods perfectly aligned and free for absolutely no binding for PURE TONE with accurate and precise tuning.

OptiMount Suspension System

The OptiMount Suspension System provides tom mounting with zero shell contact for ultimate resonance. By attaching to the tension bolts via isolated rubber bushings the shell is allowed to float which in turn allows it to sing to its fullest capabilities.

MasterCast Die-Cast Hoop

Our die cast hoops offer state-of-the-art head seating and tuning capabilities thanks to their structural strength and precision manufacturing technique. The MasterCast

Hoop system prevents binding and allows the shell to resonate to its absolute fullest potential.

FatTone Hoops

The NEW Reference PURE features Pearl's new 1.6mm Fat Tone Hoops that combine low-mass for incredible resonance with our exclusive hemmed and welded edge that adds amazing strength and rigidity at the point of contact for tremendous rim shots and cross sticking.

Bass Drum Spur

Our telescoping spurs feature rubber or spike tips for maximum traction control. The high-grip rubber tip can be retracted to allow a recessed spike to be exposed for maximum "bite" on carpeted surfaces.

Stainless Steel Tension Bolts

Pearl's stainless steel tension rods are machined from a single piece of stainless steel to the most exacting tolerances in the industry. They feature super smooth and precise tensioning with absolutely no play. Each is matched with a precision-machined brass swivel nut for ultra-precise performance.

Artisan II

Pearl's Artisan II covered finishes are created using a secret proprietary environmentally friendly process that allow us to recreate exotic wood grains without harvesting endangered species. These stunning finishes protect your kit and are the most cutting edge finishes available.

Artisan II Lacquer

Artisan II Lacquers set the standard within the industry for cutting edge styling and innovation. Utilizing Pearl's proprietary process with a High Gloss Lacquer these finishes appear on Masters MCX and Vision Maple drums. A flawless finish to compliment the design and construction of your Pearl kit.

Masterworks

Completely Custom, Totally Handmade

With no assembly line boundaries and no mass production compromises, Masterworks drums truly represent all that is possible. Each drum is a work of art, constructed by seamlessly blending the artisan qualities and wisdom of hand craftsmanship, with the technology and precision of state of the art custom built machinery. There is no inventory. Every drum in your kit is designed by you, and hand built to your exacting specifications, one drum at a time. We've assembled an elite group of Pearl master craftsmen in order to manufacture the finest drums the world has ever known. Masterworks drums are as individual as you are, and like no other you have heard or seen before.

The Endless Choices of MasterWorks

Pearl's Masterworks Series represents the fruition of over 60 years of acoustic drum research and craftsmanship. When you choose Masterworks, you're selecting drums that epitomize exactly what you want in a set of drums. Why? Because you design them. From shell thickness and composition to exterior finish and hardware plating, Masterworks is the only completely custom drumset available. There's no inventory, no pre-fabricated shells sitting on a shelf. Every drum in your kit is designed by you and built to the most exacting tolerances by the world's finest master craftsmen using the industry's most advanced custom-built machinery. Completely custom. Totally handmade. It's a musician's dream come true. Whatever your musical style, Masterworks can build a kit to express every nuance of your individual style. With Masterworks, it's about choices. The choices begin with the selection of the

shell material that precisely suits your playing style. Maple is an excellent choice for general purpose applications due to its smooth, warm, well rounded tone, with equal amounts of hi-end attack and mid-range body, and an excellent low-end punch. Birch is known for its "naturally EQ'ed sound" that offers slightly boosted hi-end frequencies, a smooth, mellow mid-range and a deep low-end presence and is a great choice for any applications that requires extra presence and cut. African mahogany is the ideal choice when maximum warmth and low frequencies are a priority.

Choosing the Wood for the Shell

Maple

Maple has been a favorite choice of drum manufacturers since the late 1700's. Its grain is a beautiful canvas for transparent finishing techniques and its tone is ideal for general purpose, all encompassing applications. Our North American Maple, like all of the woods used for Masterworks drums, is hand-selected to meet stringent requirements for proper density, age, and consistency of grain and color. Maple offers

a smooth, warm, well rounded tone, with equal amounts of hi-end attack and mid-range body, and an excellent low-end punch. Most drum manufacturers offer some form of 100% Maple drum today as it has become the standard of the industry for high end drum sets.

Features slightly boosted lows with smooth mid and high frequencies. Ideal for all around applications.

Composite Shell

The beauty of Masterworks is the ability to custom configure a kit down to the wood plies used for the shells. A composite shell, featuring more than one wood, is a great way to blend the characteristics offered by different materials. For instance, you may choose outer plies of Maple or Birch for their ease of finishing, beautiful grain and sound characteristics, and inner plies of African Mahogany to boost bass and low end punch. While

this is a very popular Masterworks composite, remember there is no wrong way to configure your shell and each drum in your kit can be different if you so choose. The only requirement is that plies must be specified in groups of 2, as in 2 outer plies of Maple plus 2 inner plies of African Mahogany, for a 4 ply shell.

Features boosted high frequencies, slightly reduced mids, and a good low end punch. Ideal for applications requiring extra focus and cut.

Birch

Birch drums have gained an almost cult following over the years which started around the 1970's. Their "naturally EQ'ed sound" offers the perfect alternative to the overall smoothness of Maple. Many professional players today prefer the sound of Birch to any other material in use for the manufacture of drums. Our prime Scandinavian Birch offers a slightly boosted hi-end cut, a smooth, mellow mid range and a deep low end presence. Many popular Birch shell

drums have found their way to recording studios where they are a favorite of both the player and engineer. Their sound translates equally for both live and recorded situations as Birch drums are a great choice for any application that requires extra presence and cut.

Features extremely rich low end frequencies, with beautifully smooth mids and a slight roll-off in the higher frequencies. Ideal for applications requiring ultimate warmth and body.

African Mahogany

Mahogany was the industry standard for drum shell manufacture for over fifty years and one listen will tell you why. Our supreme quality African Mahogany is extremely rich in low-end frequencies, with beautifully smooth mids and a slight roll-off in the higher register. Drums made from African Mahogany have warmth and body that sets them apart from all others. Few companies today offer this excellent wood for drum shells

simply because its porous exterior is extremely difficult to finish and it costs more than Maple. Without question, if your main requirements are "bottom" and punch, African Mahogany should be your wood of choice.

Carbon Ply

If you desire something more futuristic, we offer the cutting edge of drums with Carbon Fiber. This ultra exotic hybrid features 6 plies of 5.4mm Maple sandwiched between an inner and outer ply of Carbon Fiber. These drums produce a sound that goes beyond description and must be experienced.

time with multiple coats for a "mile-deep" look that you'll treasure and others will envy.

Natural Eucalyptus Teal Tamo Quilted Bubinga Natural Bubinga

Shell Thickness Options

With Masterworks you can choose the thickness of your shells to precisely tailor the sound to your exact needs. Thin shell drums offer great resonance and maximum tone that can be most appreciated in near-field applications. Thick shells are extremely "efficient" and provide ultimate volume and projection. These drums are ideal for any application requiring high sound pressure levels with maximum cut. Medium thickness shells offer a very good compromise between volume and resonance and are ideal for general purpose applications. With Masterworks, each drum can be crafted with a different thickness to precisely achieve the sound you want...the choice is yours.

Thin shells drums offer great resonance and maximum tone that can be most appreciated in near-field situations.

Thin

Thin shell drums have become extremely popular in recent years as their sound offers the best "near field" or player's experience. Our 4 ply, 5mm shell enables relatively easy energy transfer from the heads to the shell, thus causing the shells to fully vibrate. This vibration imparts a very rich, warm "wood" tone to the overall sound that can be most appreciated close to the kit while it's played. This effect is also great for recording where miking techniques can capitalize on the warmth and natural tone of the instrument. Most manufacturers offer a thin shell hi-end drum series, and Pearl's Masters Premium MMP/BMP Series drums are a perfect representation. Our 4 ply, 5mm shell also features an extra 4 ply, 5mm reinforcement ring at both top and bottom to help strengthen the shell and add support at critical head contact points for stability.

Medium thickness shells are ideal for general purpose applications and/or situations requiring more "horsepower." They offer a very good compromise between volume and resonance.

Medium

Medium thickness drums, as with our 6 ply, 7.5mm Masters MCX shells, have slightly greater stiffness and resist some of the energy transfer from the heads. With slightly less vibration, a trade-off is achieved allowing the sound to be slightly "cooler" than a thin shell drum, but with greater volume and projection. These drums represent a great choice for all around, general purpose applications, offering a warm, full bodied wood tone, with great attack, loudness and presence. Medium thickness shells may offer the best of both worlds providing the perfect compromise between resonance and volume.

Thick shells are extremely "efficient" and provide ultimate volume and projection. These drums are ideal for any application requiring high sound pressure levels with maximum cut.

Thick

Thicker shell drums are extremely "efficient" and allow most of the player's energy to be focused through the heads directly to the audience. Since the shell provides greater mass, less volume is lost through the shell in the form of resonance. They offer good tone and warmth but at reduced levels compared to their thinner shell counterparts. These drums are ideal for coliseum-type venues and other applications requiring high sound pressure levels and ultimate volume. Masterworks drums are available in both an 8 ply, 10mm thickness and a 10 ply, 12.5mm thickness. Snare drums made in these thicknesses rival metal snare drums in intensity and projection, providing a great cannon-like crack with extreme volume.

Artisan Finishes

Complete your Masterworks masterpiece with your choice of our peerless Masterworks Artisan finishes or stunning super high gloss lacquer finishes. Artisan exotic wood veneers offer gorgeous one-of-a-kind looks to set your kit apart from all others. Highly figured woods are available including Bubinga, Tamo, and Eucalyptus. Our super high gloss lacquer finishes are hand-applied over a week's

Bearing Edge Options

Nothing influences your drum's overall response than the bearing edge. That's why Masterworks gives you three bearing edges from which to choose from.

45 Degrees
Provides the perfect blend of attack and warmth.

Rounded 45
Boosts mid to high frequencies as a result of greater head-to-shell contact.

Fully Rounded
Provides maximum head-to-shell contact for a greatest boost in mid to low range frequencies.

Hardware Color

All Masterworks Series drums are available in your choice of Chrome, Gold, or Black Chrome plated drum hardware.

Chrome

Gold

"I have never played better than on a kit from Pearl. Never!"

Reference

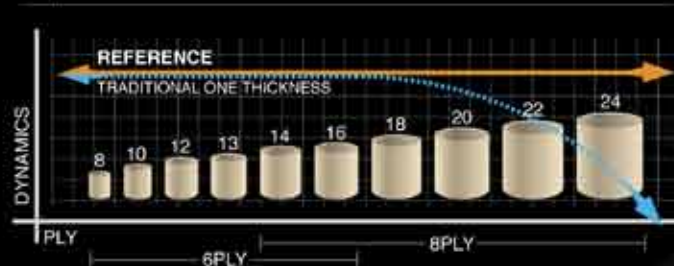

In 1999 Pearl introduced Masterworks, the industry's first truly custom series of drums, where every aspect of the manufacturing process was completely custom, from the number of wood plies, the wood selections, the bearing edges, right down to the final finish... each kit as unique as a fingerprint. Over the years, through arduous listening tests, Masterworks taught us a great deal about drums and what makes the perfect shell. We applied the lessons learned from Masterworks in the development of the Reference Series.

To fully understand Reference drums you must accept the fact that the tonal characteristics of a rack tom are completely different than that of a bass drum, and to make these drums with the same composition would result in a compromise. This is the mission behind Reference Series: To create a perfect sounding drum set where every drum is optimally engineered to produce the best sound possible within its respective tonal range and diameter... drum by drum. Forget what you think you know about drums and take a closer look at Pearl's Reference Recipe and the blending of its three task-specific components.

Introducing the All New

Reference PURE

The Reference Mission

Pearl's all new Reference Pure proudly builds upon the legacy started by Pearl's original Reference Series Drums by using the exact shell composition formula, the same number and type of wood plies, and the same targeted task specific bearing edges to create a thin shell, highly resonant, lower mass version of the original. To accomplish this, we start the process by choosing thinner plies of prized Maple, hand selected Birch and rare African Mahogany. While Reference drums use a rotating combination of both 1.6mm and .9mm wood plies in its shell construction, the all new Reference Pure uses only .9mm thick plies in its construction. The result is a thin, resonant, extremely vibrant yet powerful near-field experience for the player with the wonderful accentuation effects of Birch and African Mahogany placed exactly where they are needed most. To maintain maximum resonance, Pearl's Reference Pure features our super low-mass elegantly designed STL Tube Lugs and our all new thin Fat Tone Hoops with our exclusive hemmed and welded edge resulting in a hoop that is both lightweight and extremely strong to further promote maximum resonance. For those looking for a thin shell alternative to our legendary Reference Series drums, your wait is over. Reference Pure. Pure Tone. Pure Resonance. Pure Perfection.

Pure Tone. Pure Resonance. Pure Perfection.

No. 335 Black Cherry

Reference PURE

Ray Luzier
Korn

“WOW, I couldn't believe these hoops — low profile, low mass and fat open tone — just like the name! The rim shots both on toms and snare sound fantastic yet more clarity than standard triple flange hoops. Perfect match for the low mass lugs and shells..”

STI Lug

STL swivel tube lugs are super low-mass allowing the drums to vibrate freely for ultimate resonance. The swivel nut keeps the tension rods perfectly aligned for accurate and precise tuning.

FatTone Hoops

Reference PURE features Pearl's new 1.6mm Fat Tone Hoops with exclusive hemmed and welded edge that adds amazing strength and rigidity for tremendous rim shots and cross sticking.

Introducing the All New
VISION
Series

Next Level Perfection

Some companies in the intermediate category compromise quality and features in exchange for low prices. Pearl will never make this sacrifice. Pearl's philosophy is to always offer the most professional features while maintaining affordability. In 2011, Pearl continues this tradition with the all new Vision Maple and Vision Birch Series drums. Both series feature Pearl's legendary 6 ply shells that are formed using Pearl's exclusive SST (Superior Shell Technology) shell-forming process, the same process that's used on all Pearl Professional Series drums. Vision Maple Lacquer features Pearl's amazing Artisan II Lacquer finish. Vision Birch Lacquer features the natural EQed sound of 100% birch. Vision Birch Artisan delivers full birch quality in 3 beautiful Artisan II finishes you have to see to believe. Vision Birch offers high-gloss coverings where durable solid color finishes are needed. Select finishes are available with black hardware. Vision, the next level of perfection for the drummer who can tell the difference.

Vision

Vision Maple Lacquer

Maple Shell

Vision Maple Lacquer is Pearl's most affordable Maple shell pack. Maple, known for its warm, rich tone, has long been the choice wood of professional drummers worldwide. Pearl offers 3 Shell Pack configurations; each comes standard with professional Two Ply heads and matching Maple snare drum. These incredible sounding drums are offered in exclusive High-Gloss Lacquer Finishes including Pearl's exciting new Artisan II Vintage Wine Lacquer Finish.

"I have been with Pearl for over a year now and I couldn't be happier. My drums sound amazing, the hardware is solid, and the staff is always helpful. I am proud to be a part of the Pearl family."

REAL LOOK. REAL FEEL. REAL SOUND.

E-Pro Live is a revolutionary electronic drumset that looks, feels and sounds like real drums. Never before has today's drummer been offered the limitless sonic capability and realistic feel of electronic drums on a drumset built with real drum shells, real brass cymbals, and real drumset hardware, all from the percussion industry's leader, Pearl.

REAL LOOK

E-Pro Live looks like real drums because the appearance of your gear is important. It's a statement about who you are as a performer. As drummers we would rather be seen playing real drums and not a collection of practice pads.

EPLX205P/B
#464 Quilted Maple Fade

REAL FEEL

Real Feel is the next important ingredient of E-Pro Live. Because, whether you're practicing or performing, we believe playing electronic drums should feel as much like playing acoustic drums as possible. Playing traditional electronic drums with their tightly configured small pads forces you to alter your playing style. E-Pro live drums are sized and configured exactly like acoustic drums for a natural and real feel.

EPLX205P/B
#31 Jet Black

ACOUSTIC SHIFT

E-Pro Live is two kits for the price of one. E-Pro Live is made with real drums and turning your kit into a great sounding acoustic drumset is as easy as 1-2-3. One, remove the top hoop and the Tru-Trac head. Two, replace with a regular drumhead. Three, replace the top hoop, and tune and play!

Real Sizes

No more playing on small, black 8" pads. E-Pro Live features 10 x 6.5, 12 x 7 and 14 x 8 rack toms with a 20 x 12 bass and 14 x 4.5 snare with white heads.

Real Hardware

No one makes better hardware than Pearl, and the foundation of E-Pro Live starts with the modified Icon Rack. The tom arms, shells, cymbal holders and rack are all covered by Pearl's lifetime warranty. The rack will accommodate adding more drums and cymbals.

Real Shells

E-Pro Live features 6ply wood shells along with robust drum hardware and durable drum finishes. Two finishes are available: #31 Jet Black and Pearl's exclusive Artisan II finish, Quilted Maple Fade (#464).

Tru-Trac Drumheads

Pearl's Tru-Trac Electronic Heads feature dual-zones that reproduce all of the intricacies a drummer hears when playing acoustic drums. The smooth coating on the heads makes moving from drum to drum fast and easy. The formula used to create Tru-Trac Heads produces a feel virtually identical to acoustic drums.

E Classic Cymbals

The cymbals featured on the E-Pro Live are Pearl's E-Classic high-end electronic cymbals, made with real brass. The E-Classics feel and respond to your playing just like real cymbals, because they ARE real cymbals. E-Classics feature a 3-zone plus choke 16" Ride, 13" chokable crash and super responsive 12" Hi-Hats.

EPC2

Traditional rubber EPC2 cymbals are also available and feature a 14" 3-zone Ride, a 12" Crash, and 12" super responsive hi-hats.

REAL SOUND

The ultimate goal of a drum module is to reproduce the REAL SOUND of drums. And who better to engineer REAL SOUND than Pearl, the company who knows drums the best. The r.e.d.BOX is Pearl's drum module. R.E.D. stands for REAL ELECTRONIC DRUMS, and it's also the color of this amazing module.

r.e.d.box

MODULE CONTROLS

- a. **Main Volume** - Controls volume level of the main out.
- b. **Headphones** - Adjusts Headphone Volume
- c. **12 Channel Mixer** - Faders allow you to adjust the mix in real time while playing. Includes click volume control.
- d. **LED Screen** - Navigate the system with ease using the soft function keys and the large backlit screen.
- e. **Edit Functions** - Full edit functions allow you to layer sounds, edit the instruments assigned to a trigger, adjust trigger parameters, change

- f. **Value Controls** - Scroll through the parameters using the dial or Up/Down Buttons.
- g. **Sequencer** - The built in sequencer allows you to record your own patterns, or play along with the pre-recorded tracks.
- h. **Headphone Output**

SPECIFICATIONS

Sound Generator	Sound Generator	PCM Drum Modeling

MEMORY SWITCH

One of the most unique features of the r.e.d.BOX module is the ability to flash the memory of the module and replace the Original Acoustics with one large and lush-sounding kit. Just follow these easy steps and you'll be on your way to playing premium kits on your E-Pro Live from the best drum sampling software companies in the world!

1. Visit redboxsoundshop.com to preview and purchase specially designed kits from Toontrack, BFD, Ocean Way, Steven Slate, Sonic Reality, and Virtual Drum Line and download the free software that allows your PC or Mac to communicate with the r.e.d.BOX.
2. Connect your computer to the r.e.d.BOX with a USB cable.
3. Launch the Memory Switch communication software and move the Original Acoustics to your computer.
4. Using a Mac Drag and drop the Lush kit onto the r.e.d.BOX icon which loads in 20 minutes. (Separate instructions required for PC)
5. Reverse the process to replace the original acoustics.
6. Free samples of lush sounding kits and drumless play-a-long tracks are available at redboxsoundshop.com.

Sound Partners:

Internal Memory

The r.e.d.BOX has 128MB of RAM. The full memory is used to accommodate the Original Acoustics of 1000 High Definition sounds and 100 High Definition kits. The sound library includes acoustic and vintage drums, electronics from beat machines to modern digital and a variety of orchestral, concert and world percussion instruments. All sounds are fully editable including Tuning, Decay, Filtering, Level, Panning and Attack. Assign effects include Reverb, EQ, Flanger, Chorus, Vibrato, Delays and Compressor.

Pad & Cymbal Inputs
12 Dual-Zone trigger inputs for 24 unique sound sources

MIDI IN/OUT
Connection with external MIDI device

USB IN/OUT
Input for loading new sound sets from Mac or PC. Sends and receives MIDI

AUX IN
Connects to external sound source

AUX OUT
Connect to monitor system or recording device (sound assignable)

MAIN OUT
Connect to amplifier or speaker system (sound assignable)

Pearl THRONE THUMPER

FEEL Your Drums

Introducing the Pearl Throne Thumper powered by Buttkicker. The Throne Thumper attaches to any drum throne and is the ultimate low-end sound re-enforcement tool. Feel the beat like never before. Powered by a 200watt amp, your throne will vibrate in perfect sync with all the low-end thunder your kit can generate. The Throne Thumper is compatible with any electronic drum set or audio output when your acoustic drums are mic'ed. Make practicing more fun with rump rattling vibrations or feel the bass players groove on a live show where hearing the other musicians can be tough. Music grooves harder with the Throne Thumper.

THMP1

Contents

- a. Pearl Throne Thumper with Fast Clamp attachment system
- b. 200 watt BASH Power Amplifier
- c. 2 meter Guitar Cable (1/4" male to 1/4" male connectors)
- d. 3 meter 14 gauge Speaker Cable (banana plugs to tinned ends)
- e. Amplifier Power Cord

Pearl Precision Drum Monitors

Introducing the all-new Precision Drum Monitors from Pearl: professional studio-quality isolation headphones engineered for drummers. Featuring an over the ear noise-cancelling design, Precision Drum Monitors give drummers crystal clear, full bodied sound for the supreme listening experience. In high-volume environments, you will no longer need to crank up the levels in your headphones, creating risk of hearing loss.

Pearl Precision Drum Monitors feature 250 ohm drivers with a gold plated 3.5 mm stereo jack and 1/4" inch adapter, making them suitable for use with almost all headphone amplifiers

PDM250

Monitor your drum sound, fellow musicians, and bring your every-day music listening into the world of supreme audio quality. Every detail matters – Pearl's Precision Drum Monitors make the difference.

Drumometer

When the pad is struck, the timer immediately starts counting down and the counter records each drum stroke until the desired time has elapsed. When the timer reaches zero, the Zero Tone Alert sounds through the internal speaker and the total number of strokes played is displayed. How fast are you?

Reference & Reference PURE

Reference Series wood snare drums feature 20 ply shells, with 6 inner plies of Birch and 14 outer plies of Maple, making it one of the loudest wood snare drums available. The 6 inner plies of Birch provides cut and attack while the outer 14 plies of Maple provide warmth and solid midrange punch. The shell's 45 degree bearing edge provides minimum head dampening for intense crack and attack. Reference Series metal snare drums redefine the standard for metal snare drums, just

as our wood Reference Series snare drums did for wood snare drums. Both feature Reference swivel lugs for perfect tension rod alignment, MasterCast die cast hoops, SR-1000 Glide Lock strainer with patented locking lever that prevents the throw-off from disengaging no matter how hard you play, and UltraSound SN-1420D Graduated Tension Snares for extended dynamic range and sensitivity.

Masters

Masters Premium & Masters MCX

Pearl's Masters Premium Series snare drums feature revolutionary swivel lugs that assure perfect tension rod to lug alignment for optimal head seating and precision tuning. MasterCast die-cast hoops, stainless steel tension rods, innovative "Golden Ratio" air vents for increased attack, and a "vertical pull" SR-017 strainer all come standard on these spectacular snare drums. Masters Premium snare drums are available in a total of 31 finishes including 26 super high gloss lacquer finishes and 8 premium Delmar covered finishes, 3 of which are glass glitter finishes with real glass flakes for incredible radiance.

Matt McDonough
Mudvayne

"Pearl is always at the front of the pack with new and innovative snare drums."

SensiTone Elite

SensiTone Elite snare drums offer unparalleled options for the discriminating drummer of today. This series provides a virtual cauldron of advanced metallurgy with a choice of 1mm Steel, or 1.5mm Brass. Each of these instruments brings a distinctive sound inherent to its individual aural alchemy. Choosing one will be tough, may we suggest collecting the whole series?

SR-1000 Glide-Lock Strainer

Pearl's SR-1000 Strainer, used on UltraCast snare drums, features two locking systems for 100% slip-proof security. The strainer lever locks securely and releases at the push of a button (US Patent #7,220,905) The tension adjuster also locks and adjusts by pushing and turning the tension knob (US Patent #7,365,256). Low-Friction Plates (US Patent #7,301,087) assure silky smooth action and tight tolerances for precise snare settings.

When you hear players like Morgan Rose, Sam Loeffler (Chevelle), and Kris Myers (Umphey's McGee), you're hearing the power of UltraCast. Available in 2 sizes, only one attitude.

UltraCast

UltraCast has turned into a modern gothic novel. An experiment gone awry. A monster in the truest sense. We set out to make a precision milled cast Aluminum shell that would project energy and be heard over the chaos of a live band. UltraCast has done that beyond our wildest dreams.

Free Floating System

Pearl Free Floating Snares feature a patented system with no hardware attached to the shells. With nothing to encumber its ringing clarity the shells are free to vibrate with unbridled response and truest articulation. Pearl Free Floating System snare drums are available in several sizes in Steel and 6 ply premium Maple. All Free Floaters feature our SR-1000F Glide-Lock Strainer with locking snare tension knob and patented locking throwoff lever that will not loosen no matter how hard you play.

Signature Series

Imagine being able to capture the elusive sound of your drumming idol. Pearl's extensive line of Signature Series Snares gives you an opportunity to own a snare developed with input from the pros. We offer snares from some of the world's greatest players, and they're all available at your Pearl Dealer.

Joey Jordison

Joey Jordison has a reputation as one of the most influential, respected and successful drummers in the world today. Playing stadiums worldwide with Slipknot, Joey needed a snare drum with a higher pitch, monster bite, and this 13"x6.5" 1mm Steel shell Power Piccolo delivers the rage and power you'd expect from Joey.

As one of the world's most respected International session musicians and clinicians, Dennis' signature snare drum has outstanding sound and tonal dynamics. This top specification drum includes a wide range of features to help you achieve the perfect sound.

DC1465

Size (Dia. x Depth) :	14" X 6.5"
Shell :	4 Ply Maple w/4 ply Maple Reinforcement Rings
Hoops :	MasterCast (DCS1410 / DC1410SG)
Lugs :	CL-100
Rods :	10
Tension Rods :	SST-5047 Stainless Steel Tension Rod
Strainer :	4-Way Adjustable / SR-020 on both sides
Snares :	S-030N
Color :	#136 Opal White

Omar Hakim

Having played the drums for Sting, Madonna and David Bowie, to name but a few, Omar was looking for a unique sound in designing his signature snare drum. The 13" x 5" shell has a power piccolo sound while the Mahogany helps to produce the perfect blend of sonic power, projection and tonal color.

OH1365

Size (Dia. x Depth) :	13" X 5"
Shell :	6 Ply African Mahogany
Hoops :	SuperHoop II (SH1308B / 1308S)
Lugs :	CL-55
Rods :	8
Tension Rods :	SST-5047 Stainless Steel Tension Rod
Strainer :	SR-015
Snares :	SN-029N
Color :	#140 Natural Mahogany

Virgil Donati

Virgil has pushed back the barriers of playing drums with his innovative use of the instrument, complex rhythms, creative phrasing and extreme speed, and naturally he has taken great care to design a unique snare drum. Using a 8 ply blended shell, rounded bearing edges and a totally flat snare bed, Virgil's signature snare drum is as state-of-the-art as his playing.

DC1465

Size (Dia. x Depth) :	14" X 5"
Shell :	8 Ply (Outer: 4 ply Maple / Inner: 4 Ply Birch)
Hoops :	MasterCast (DC1410 / DC1410S)
Lugs :	TB-50
Rods :	10
Tension Rods :	SST-5042 Stainless Steel Tension Rod
Strainer :	SR-017
Snares :	SN-022N
Color :	#188 Smoke Fade

Ian Paice

Deep Purple's legendary drummer designed this snare drum to have classic looks and classic sound with modern technology. The 6.5" steel shell will give you a big rock sound, and the locking nuts will help your drum to "stay tuned all night".

IP1465

Size (Dia. x Depth) :	14" X 6.5"
Shell :	Beaded Sheet Steel
Hoops :	SuperHoop II (SH1410 / 1410S)
Lugs :	TB-65
Rods :	10
Tension Rods :	SST-5042 Stainless Steel Tension Rod
Strainer :	SR-017
Snares :	S-022N

Ultra-Sound Snare Wires US.PAT.7202405

Pearl's UltraSound snares feature patented Graduated Tension wires with strategically positioned looser and tighter wires. The looser wires respond to the lightest touch while the tighter wires maintain head contact during the loudest playing. Combined, Graduated Tension wires extend the dynamic range of UltraSound snares far beyond that of standard snares. The SN-1420C features "C" shaped end plates with looser tension wires in the center for outstanding tracking and response, and is ideal for rock music and metal snare drums. The SN-1420D features "D" shaped end plates with tighter tension wires in the center for superb sensitivity, and is ideal for classical music and wood snare drums. The SN-1420I has even tension snare wires for those who want traditional snare dynamics, but with the benefits of the UltraSound's non-plated rust proof snare wires and ultra-thin, low mass 0.6mm Phosphor Bronze end plates for ultra quick response. The end plates have three mounting options: tunnels and holes for cord mounting, and slots for straps.

SR-1000 Glide-Lock Strainer US.PAT.7220905/7301087

Pearl's SR-1000 Glide-Lock strainer addresses two age-old strainer problems that have plagued drummers for years: the throw-off lever flipping off and the tension knob loosening while playing. The SR-1000's patented throw-off lever features a Positive Lock system that locks in the ON position and completely removes the possibility of the snares turning off no matter how hard you play. Using patented low-friction technology the lever has a smooth gliding action to raise and lower the snares with ultra quiet precision. The patent pending tension knob also locks and both the throw-off and butt plate can be removed from the shell with the snares attached to allow quick and easy bottom head changes.

THE FASTEST, SMOOTHEST, MOST VERSATILE PEDAL IN THE WORLD.

Heavenly Feel.

The Direct Link's spherical bearings and a combination of custom settings create the smoothest pedal action possible.

Wickedly Fast.

Micro polished Ninja bearings along with self-aligning spherical bearings and the zero latency Z-link give the Demon Drive incredible speed.

Ninja Bearings

Designed for skateboarding these bearings feature micro-polished steel balls for amazing low friction.

Shown in Longboard Setup

Tailor Made To Your Foot

With seemingly endless adjustments, the Demon Drive can be tuned to your specific taste.

DUO-DECK LONGBOARD

Converts quickly from shortboard to long board via 4 screws under footplate for your choice of feel.

BEATER STROKE ADJUSTMENT

A choice of 2 positions for a Finesse or Power. Simply loosen the clamshell to change position.

DIRECT LINK ADJUSTMENT

The 2 position direct link adjusts for a choice of light or heavy feel.

CLICK LOCK SPRING TENSION

The Click Lock prevents the tension knob from loosening. Simply flip up for adjustment.

ADJUSTABLE TRACTION PLATE

The Aluminum Traction Dots are fully adjustable to vary the amount of slip or grip for your playing.

FOOTBOARD HEIGHT ADJUSTMENT

Loosen and rotate to desired footboard height. Rotation is clearly indexed for ease of setup.

ZERO LATENCY U-JOINTS

Zero latency Z-Link U-joints prevent backlash and promote optimal feedback for incredible speed and control.

Z LINK DRIVE SHAFT

Adjustable machined Aluminum for perfect positioning and flex-free energy transference for precise feel.

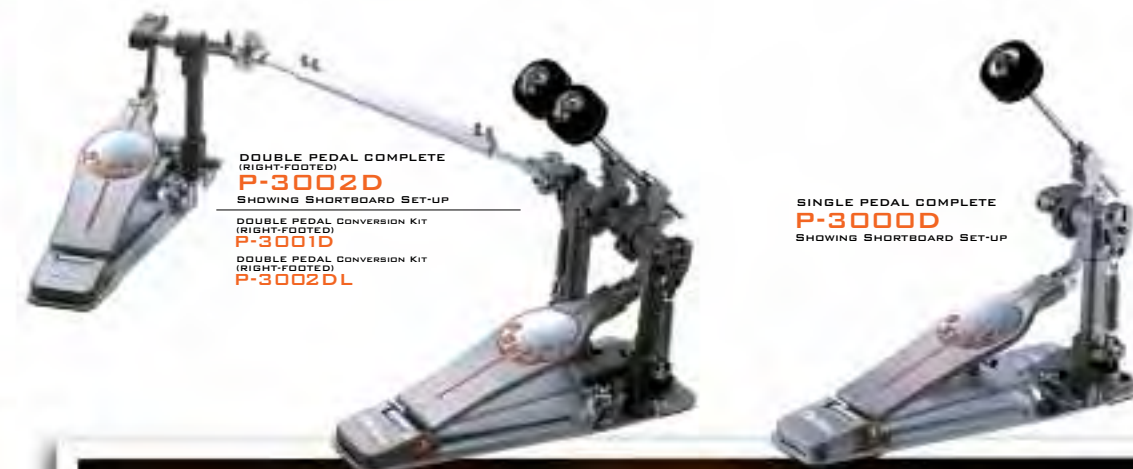

CONTROL CORE BEATERS

The standard Control Core Felt and the optional wood beater feature anti-vibration elastomer core.

CARRY CASE

The Demondrive comes standard with a carry case to protect your pedal from the wear and tear of travel.

PEARL DRUM PEDALS

POWERSHIFTER ELIMINATOR DRUM PEDALS P-2000 SERIES

CHAIN DRIVE

Pearl's sprocket-less double chain drive provides super smooth action with powerful and precise feel. Since there are no teeth, the "grinding" noise common with most chain drive pedals is eliminated making the Eliminator perfect for studio work.

P-2000C

BELT DRIVE

Our Belt Drive provides a very comfortable, natural feel similar to a direct drive system. We use an extremely strong, highly durable drive belt, instead of a normal rubber strap, to provide maximum durability, strength, and stretch resistance.

PowerShifter ELIMINATOR

P-2000 SERIES

INTERCHANGEABLE CAM SYSTEM

US.PAT.6172291

Our exclusive Cam System provides six (included 4 + optional 2) interchangeable color coded cams allowing you to quickly change the power and feel of the pedal to suit your individual playing needs. Changing from cam to cam is as simple as pushing the release button and snapping another cam in place.

OPTION CAMS

- BLACK** LINEAR ACTION CAM
- WHITE** OVERSIZED LINEAR CAM
- BLUE** PROGRESSIVE CAM
- RED** RADICAL PROGRESSIVE CAM
- PURPLE** AGGRESSIVE ACTION CAM
- YELLOW** INVERSE ACTION CAM

This is Pearl's original "perfect circle" Cam design. It offers superior power and a very natural, perfectly balanced action and smooth feel.

The White Cam is a slightly over sized "perfect circle" Cam. It offers a very natural, smooth action, with great power and balance, with a slightly lighter pedal feel.

This is the very popular "off-center" axis type cam design. It offers a light feel in the beginning that accelerates with speed and power upon impact.

The Red Cam features an extreme "off-center" axis design. The action is similar to the Blue Cam but with a lighter feel at the beginning of the stroke.

The Purple cam provides aggressive acceleration for huge power and response, second only to the Red cam.

The Yellow cam provides a slight inverse action. When maximum power is required, this is the cam of choice.

POWERSHIFTER

US.PAT.5574237

Our revolutionary PowerShifter function provides 3 positions to fine tune the power and feel of the pedal. By moving the footboard forward or back you change the chain or belt drive angle, thus changing the leverage to create a light, normal or strong feel.

INDEPENDENT TRACTION GRIPS

Power Shifter Eliminator's Traction Plate footboard insert allows you to remove and reconfigure each individual traction grip to suit your exact playing requirements. From maximum grip to full slide, and every option in between, the choice is yours. The Traction Plate also reverses to focus the slide or grip surfaces to either the toe or heel of the pedal.

ZERO PLAY HINGE

Our stainless steel hinge is manufactured with incredibly precise tolerances to prevent play between the footboard and heel yet provides maximum freedom of motion for blazing speed.(US.PAT.7179978)

FOOTBOARD ANGLE ADJUSTMENT

Footboard angle is easily adjusted and completely independent from beater angle allowing you to further fine tune the feel and action of your pedal.

ROLLER CAM HOOP CLAMP

Our Roller Cam Hoop Clamp multiplies each turn of the adjustment knob to speed the process of attaching the pedal to the hoop. It fits an extremely wide range of hoop thicknesses and offers the smoothest, most secure grip possible. (US.PAT.5726370)

WIDE TENSION-RANGE SPRING

Our counter spring has been designed to perfectly complement the weight and balance of the footboard and beater assembly. It also offers a much wider range of adjustability allowing you to fine tune the pedal tension to suit your playing style.

UNI-PRESSURE SPRING CLAMP

Our Uni-Pressure Spring Clamp System grips a full 360 degrees and allows infinite beater angle adjustments. Featuring a unique Floating Spring Pendulum design that is perfectly centered on the clamp, this system offers full precision bearing movement for unmatched smoothness.

QUADBEATER

Our QuadBeater provides four different beater surfaces, each with its own distinct sound. You can choose from 2 hard plastic surfaces or 2 felt surfaces and either pinpoint or line contact with the head.

QUADBEATER

(US.PAT.5610351)

DUOBEAT

BEATER WEIGHT

BW-100 (US.PAT.7122730)

The BW-100 Beater Weight features a main body (10.4 gram) and two removable add-on weights: Black (7.2 grams) and Silver (5.8 grams) that can be added or subtracted to achieve perfect feel and power.

HI-HAT STANDS

POSILINK TWIN CAM DRIVE SYSTEM w/ INTERCHANGEABLE CAMS
(US.PAT.6399866)

Our exclusive PosiLink drive system features twin double chain driven cams one of which accepts your choice of 6 interchangeable cam profiles (4 included and 2 optional) so you can customize the response from mild to wild. If you want a traditional direct drive feel, use one of the two round cam profiles. But if you dare, try the four eccentric cam profiles with varying degrees of offset for accelerated feel that you can't get from any other hi-hat on the planet!

No other part of your kit takes the punishment that your Hi-hat takes. It has to be fast, responsive and strong to keep the groove moving. Pearl offers a wide range of Hi-hats to complement your playing style from our light-weight, easy to carry H-72W to our state-of-the-art Eliminator, that like our Eliminator pedals, features our patented interchangeable cam system for customized feel to allow the pedal to become an extension of yourself.

POWERSHIFTER

PowerShifter allows the player to quickly shift the footboard to one of three playing positions. This changes the angle of the pull chain which in turn changes the overall feel of the hi-hat reaction.

TRACTION PLATE FOOTBOARD

Like all Eliminators, the pedal has removable traction grip inserts that can be adjusted or removed to tailor the amount of grip or slip. The plate is even reversible for more choices.

VARISET FOOTBOARD ANGLE ADJUSTMENT

The VariSet cam is infinitely adjustable to allow micro-fine adjustment of the footboard angle for optimum comfort and speed. Footboard angle can be further adjusted by moving the chain to three positions on the pedal cam.

1. SUPERGRIP CLUTCH [SGC-300P] (PAT.PEND)

The H-2000 features our SuperGrip Clutch. This clutch system uses a larger surface area with 360 degrees of grip that provides vice like clamping force for super grip.

2. HI-HAT CUP (US.PAT.7078606)

Our patented seat cup features a hinged platform for outstanding stability and consistent hi-hat sound.

3. PRECISION SPRING TENSION DIAL

Our precision Spring Tension Dial features a positive click stop design for precise control over hi-hat tension.

4. SWIVELING LEGS

Our swivelling legs allow perfect placement by themselves or with multi-pedal set-ups. (*except H-72W)

5. CONVERTIBLE SPIKE / RUBBER TIPS (PAT.PEND)

The extra large non-slip rubber feet have a push button activated spike that pops out for non-slip grip on carpet or rubber surface. A second button returns it instantly to its recessed position.

6. NEW FOOTBOARD DOCKING STATION

The H-2000 now features a patent pending footboard attachment system and docking station for improved stability and security during transport. The footboard is attached via a tongue and groove-type locking system that holds the stand rigidly at a perfect 90 degree angle for maximum stability. The integrated docking station clamps the footboard safely and securely during transport for maximum protection of the chain and cam system.

7. STANDARD CLUTCH (CL-300)

Our CL-300 clutch used on H-1000 series hi-hats features our Triple-Lock gripper system for zero slippage.

8. FOOTBOARD ANGLE ADJUSTMENT

The H-1000's exclusive threaded foot board connector allows the footboard to be infinitely adjustable for maximum speed and comfort.

9. ROLLER PULLEY SYSTEM (US.PAT.5018426)

The roller system uses a pulley to provide incredible cymbal force with minimal pedal exertion.

ADVANCED HARDWARE SYSTEMS

Our Snare Stands are available with a wide range of options and features. From our lightweight easy to carry S-790W for the local gig to our flagship S-2000, all Pearl snare stands will cradle your prized snares perfectly and dependably for years to come.

Hundreds of Snares,
One Snare Stand

S-2000

**ALL FIT SNARE STAND
S-2000**

ALL FIT SNARE ARMS
The all-fit snare arms found on our S-2000 allows individual adjustment of the snare arms to fit drums from 10" to 16". This unique feature also allows the offset placement of your drum for total positioning control. The patented (US.PAT.6710236) Air Suspension rubber tips securely cradle your prized snares without applying unnecessary pressure to the shell. This offers security for your snare without compromising resonance and sustain.

GYROLOCK TILTING SYSTEM
The GyroLock tilter allows complete tilt control over your snare angle. The Ultra-Grip wingnuts make adjustments quick and sure.

PUSH BUTTON CONVERTIBLE RUBBER TIP
The S-2000 features convertible rubber/spike tipped feet that allow your stand to adapt to any playing surface. A push of a button activates spike tips that provide maximum bite on carpeted surfaces. A second button returns them to their recessed position. (PAT.PEND)

DRUM THRONES

If you can't sit comfortably you can't play your best. That's why Pearl thrones, like our Roadster Series, feature ergonomic accents that promote good posture and comfort during extended playing. Innovative features such as the reversible backrest, and ergonomic cushion on the D-2500BR throne and the shock absorber cushion on the D-1000SPN that minimizes shock to your spine to fend off fatigue, are just some of the comfort features you'll find on Pearl thrones.

CYMBAL STANDS

Pearl cymbal and boom stands are the choice of the working drummer. Solid and strong with thick chrome finishes that ensure a long life and dependable service, Pearl Advanced Hardware Systems stands are available with a wide range of options to fit your every need. From the studio to the stage, you can count on Pearl hardware.

WINGLOC (US.PAT. 6884015)

Our WingLoc quick release wing nut makes old fashioned wing nuts a bleak memory with its snap on, snap off ease of use. Whereas traditional wing nuts have to be manually unscrewed or screwed tighter, the WingLoc just slides onto a cymbal holder and snaps together to hold the cymbal firmly in a matter of seconds.

Our patented Reversible Seat Cup (US. PAT. 6940006) can be set to Float like a traditional seat cup or it can be reversed and Locked for 100% rattle-free performance for recording applications.

GYROLOCK & UNI-LOCK

GyroLock allows a full 360 degree range of motion for the fastest, easiest, and most precise setting of cymbals and toms. See it on our award-winning and revolutionary BC-2000 boom stand. Spin it. Lock it. Play it! Uni-Lock tilters provide infinite positioning options and lock securely with a twist of our ergonomic UltraGrip wing bolts.

SETTING

The BC-2000 offers so many diverse mounting possibilities. With a built-in knurled post, it's perfect for adding cowbells or percussion effects. Add on some additional TL-2000 GyroLock Tilters and mount multiple cymbals on the same boom tilter.

DETACHABLE COUNTER WEIGHT

The detachable counterweight ensures perfect balance and stability.

DIE-CAST JOINT

Our die cast pipe joints provide unrelenting grip for solid and dependable positioning while the hidden nylon bushings inside the tubes prevent metal-to-metal contact for rattle free and quiet performance.

SURESTRUT & STOPLOCK

The BC-2000 also features our double strut legs to prevent lateral movement and positive stop memory locks for repeatable height settings.

OVERSIZED NON-SLIP RUBBER FEET

The over-sized non-slip rubber feet are the foundation of the BC-2000's stability. They provide sure footing and absorb unwanted overtones.

Signature Series

Marc Quiñones Signature Timbales and Timbal Bell

The Marc Quiñones Signature Timbales feature premium steel shells in the standard 14" and 15" sizes, fitted with Remo Clear Ambassador drumheads. The polished steel shells have two inverse beads that add strength, as well as providing a cutting "cascara" sound. The 5-lug design is perfectly proportioned for maximum shell contact area and less lug interference. Includes heavy-duty double-braced tilting stand and PBL-30 clave block.

The Marc Quiñones Signature Timbal bell is the ultimate salsa campana cowbell. It's rugged one-piece steel construction is specially made to produce the classic salsa sound, and is engineered to cut through the largest of Latin ensembles. This is the only salsa bell approved by Marc Quiñones, and is the only salsa cowbell you will ever need.

Richie Flores Signature Oak Congas & Bongos

PCW-110DXRF 11" Quinto | PCW-117DXRF 11.75" Conga | PCW-125DXRF 12.5" Tumba
PBW-300DXRF 7 & 9" Bongos

Why settle for one color when you can have solids, sparkles and fades all in one set of congas and bongos! With Richie Flores Signature drums you can have it all! Richie's exclusive "vertical" fade Lunar Eclipse finish transitions from dazzling Silver to rich Midnight Blue dusted in stellar sparkles as you turn the drums. Fade your congas from left to right, right to left, all Silver Sparkle or all Midnight Blue Sparkle...the color possibilities are limitless! The bongos feature an extra set of holes to allow the shells to be reversed to match the congas. Thai Oak shells with Contour Crown Rims, brilliant chrome plated hardware, and our exclusive Self-Aligning Washer System (S.A.W.S.) for effortless tuning round out the features of these beautiful instruments.

#527 Lunar Eclipse

Bobby Allende Signature Fiberglass Congas and Bongos

PCF-110DXBA 11" Quinto | PCF-117DXBA 11.75" Conga | PCF-125DXBA 12.5" Tumba
PBF-300DXBA 7 & 8.5" Bongos

Bobby demands the best, so he designed his Signature Fiberglass Congas and Bongos to exceed all existing standards, right down to the smallest detail. For example, the seams are invisible, thus giving his congas the look of natural wood. The congas are 28" tall to fit the traditional seated player, and the wider base adds projection and stability. A new rim design on both congas and bongos adds extra comfort while complimenting the fitted Remo Fibreskyn3 heads.

Jesus Diaz Radial Edge Cajon

PBC509JD

In conjunction with world-renowned percussionist Jesus Diaz, Pearl has created the Radial Edge Cajon to finally produce the authentic sound and feel of the traditional cajon, with modern features to enhance comfort, playability and sound. The radial edge of the cajon provides a contoured design for an unprecedented level of comfort. It's high-end wood construction, fixed snares and luxurious Artisan Rosewood finish make this the ultimate Box Cajon for the percussionist looking for the richest cajon experience possible.

Horacio "el Negro" Hernandez Signature Cowbells

Designed by Horacio Hernandez, this series of five cowbells are pitched in accordance to "el Negro's" strictest of standards. Intended for Drumkit and Percussion players, the unique features include two playing surfaces: flat on one side, and curved on the other. The tone is the same, but the distinctive bi-shaped design will give the player the option of striking the bell directly facing in or the side (like a timbale player). The two-position cowbell bracket will ensure that the wing-nuts will not get in the way when stacking multiple bells and blocks on one post. This makes it much easier to adjust the bells from virtually any position. Another exclusive feature is found on the smallest bell, the HH1 Bella two rubber gaskets separate the mount from the body of the bell offering maximum tone and resonance that is usually "choked" and "dry" with other cowbells of this size. Finished in beautifully plated copper, this professional line of cowbells sound and look like no other on the market.

HH-1 BELLA Hi-pitch Cha-Cha bell
HH-2 ClaBELL Foot-Clave bell
HH-3 ChaBELLa Low-pitch Cha-Cha bell
HH-4 IsaBELL Mambo bell on BD
HH-5 MaryBELL Timbale bell

PPS-20 Cowbell Footpedal Bracket with HH-2 and P-2000C
The PPS-20 features a square dimpled post for maximum support without the "L" rod slipping. The eyebolts and pegs are knurled and reversible from rubber tip to spike.

Congas

Pearl has congas to meet the needs of every player from seasoned professionals to beginners. Our Elite Series offers the highest quality heads with polished Contour Crowns and a choice of shell materials: 100% aged Oak or seamless Fiberglass. Our Primero Pro line features professional-quality construction at an affordable price and a choice of 100% Oak or Fiberglass construction. Primero features outstanding Pearl quality and a choice of 100% Oak or Fiberglass construction at value pricing.

Travel Congas

The Travel Congas are available in three standard head diameters: 11", 11.75" and 12.5" yet only 3.5" deep. They feature wood shells and stave construction (identical to our full-size congas) and the Remo FiberSkyn 3 synthetic head for outstanding tone that is unaffected by changes in temperature or humidity. Five precision Allen bolts provide accurate and easy tuning via the included foam-handle Allen wrench. Pearl's Travel Conga stand is designed specifically with two things in mind: rock solid stability, and lightening fast set-ups and pack-ups. The stand includes a "Y" bracket that attaches to the bottom of your Travel Conga and mounts to the stand centered directly under the drum for maximum stability. The Travel Conga stand comes with a carrying bag that includes a pocket for the optional PPS-50TC Bridge that connects two stands together to minimize creeping while performing.

Travel Cajon

The perfect compliment to the M.I.P.A. Award-Winning Travel Conga is Pearl's Travel Cajon. This portable Cajon is packed with "full size" features and sound that, like the Travel Conga, will fool most ears into believing it is the real thing. The 12" wood playing surface resonates the 6-1/2" shell with a solid bottom. The Travel Cajon can be mounted comfortably on your lap (secured by the included Velcro strap), or on a snare stand in a seated or standing position. Finished in Gloss Black Pearl's Travel Cajon is portable, versatile, and contagiously fun to play.

DjemBass
PJB5-350

Convert our most popular PJJ-350 Fiberglass Djembe into a compact kick drum with the DjemBass accessory pack. To reduce the attack and add greater "lows" we have included a cloth cap that stretches around the head. For greater low-end, slip the included neoprene disc inside which give you two sound options. Your pedal (not included) attaches via an I.S.S. type clamp to the Djembe's stand mounting plate.

FunBox
PFB300

In response to increased support and awareness of the value of music and drums in education, particularly with young children, Pearl has created the Fun Box. The Fun Box, much like Pearl's popular Fun Drum Djembe, is specially designed for use by kids to help them develop proper playing mechanics while playing an instrument in a smaller, kid-friendly size. The Fun Box features the same bright yellow finish with tribal inlay as the Fun Drum, and it's durable Fiberglass construction makes it a perfect addition for use in Eddie Tuduri's Rhythmic Arts Project.

BoomBox
PCJ633B8

The Boom Box Cajon creates never-before-heard low-end frequencies from a Fiberglass cajon! This cajon features the high-quality construction you expect from Pearl, with a fixed snare system and a built-in bass port for subsonic frequencies you have to hear to believe! Finished in a rich Artisan Red Mahogany, this is a perfect addition to any drummer or percussionist's rig.

2Face Cajon **NEW**
PBC-512F
Two Faces - 2 Different Sounds

The New 2Face Cajon has two distinct personalities. The professional quality wood construction box drum is ported on the side with two different playing faces on the front and back. One face is 5mm thick offering a more mellow woody sound, while the reverse face is 3mm thick and gives all the punch, thump, and crack you could ask for. Both sides feature 3 sets of fixed snares. When its gig time you'll have two professional level instruments in the size of one. Simply turn the instrument around and you can quickly change tonal characters- between songs or even between choruses. Pearl Percussion's new 2Face Cajon gives you twice the possibilities and twice the personality to choose from. Be bold or be mellow... or be both at the same time.

Pearl Percussion

Timbales

Pearl's Primero Pro Steel timbales are a budget conscious timbale set packed with professional features. The heavy-duty double braced tilting stand securely supports the 14 & 15-inch steel shells that are 7 inches deep for added projection and greater cascara surface area. The cowbell mount is based off our PT-900 Timbale stand making set-up and teardown possibly in seconds. Tuning wrench and sticks are included.

Djembes

Djembes are a traditional African instrument that offer a wide variety of sounds and are perfect for drum circles. The Professional Elite Series is available in Oak (12.5" diameter) and Fiberglass (12.5" and 14" diameter). All feature our Contour Crowns for comfortable playing and authentic Goat skin heads for deep lows and crisp highs.

EZ-Tune Djembe

Pearl's EZ Tune Djembe is the first djembe ever to combine the traditional look and feel of a rope djembe with the modern functionality of a mechanical tuning system. Available in 12.5" or 14" sizes and with traditional oak or lightweight Fiberglass construction, the EZ-Tune Djembe provides the incredible low-end response and cutting high-end projection that Pearl djembes are known for, with unprecedented tuning accuracy. EZ Tune Djembes truly are the future of Djembe construction and function.

Cajons

Pearl offers cajons for every player and musical situation. The popular Jingle Cajon, designed in conjunction with percussionist Pete Korpela, offers four different sound possibilities in one package. The fiberglass body adds superior strength, while the responsive snare system offers unmatched sensitivity. Beautifully finished in exclusive Carubinga exotic wood veneer, players can utilize the Brazilian Platinella-style jingles or the tambourine-style jingles separately or together, simply by twisting open the jingle fastener. From the Primero FunBox for kids to the Subsonic BoomBox, Pearl's Cajons are sure to add a unique sound to your percussion arsenal.

Concert Percussion

Pearl is proud to offer Concert Percussion instruments that are attractively priced for school ensembles, yet engineered with the professional percussionist in mind. The symphonic tambourine is a perfect example. It's 17 pairs of specially aged, stamped brass jingles provide a dry, yet bright tone that brings added color and to any musical situation. It's 10" headed wood frame allows the player to effortlessly perform all tambourine techniques, and the tambourine's plush carrying case is included. The castanets are pitch-paired and made from Chin Chan wood. Their handles can also function as claves, making these double-use instruments a perfect orchestral package. The rattler is another vital component to any concert percussionists' equipment, and Pearl's is built with an extended handle for a comfortable grip and ease of playing. Holders for the rattler and castanets are also available.

Taiko

All of Pearl's Taiko are made from staved oak which are beautifully finished in a matte natural stain and produces the rich warmth of wood without the expensive price tag of a traditional carved shell. The insides of the shells are shaped using a method called "Hado-Carving" with special reinforcement rings which are placed to break up the unwanted overtones producing a balanced sonic reflection within the drums. But the sound starts on the outside, with premium cow hide exclusively chosen for Pearl Taiko drums. Pearl's Bachi are from a domestic hardwood in Thailand known as Acacia and offered in three different diameters to suit the size of both the player and Taiko. You will want to protect your investment of these beautifully crafted instruments, so Pearl offers soft padded carrying cases for the larger Miya Taiko.

Brazilian Percussion

Pearl's line of Brazilian Percussion brings modern refinements and Pearl quality to the traditional Samba musician. Our Repinique's now feature lightweight yet sturdy steel shells with etched heads, shoulder straps and low rims for incredible playing comfort. The lightweight wood shell Surdos allow for hours of comfortable play when worn over the shoulder with the provided strap. Now available in 18"x22", 20"x18" and 22"x22" sizes (diameter x depth), Pearl's popular Surdos continue to become the industry standard. The timbao is made from lightweight fiberglass, and is capable of the extremely high tension utilized in tradition Brazilian ensembles. The Rocar is equipped with brass and steel platinellas, and can be played as a single shaker, or separated for two-handed sonic options.

Pearl's natural gourd Shekeres have three distinct tones accentuated by a fiberglass gel that coats the interior for strength, added volume and rich sustaining tones. The beaded netting features traditional designs and colors, and is infinitely adjustable from tight to loose in seconds to customize your feel and sound.

As a complement to the Folkloric Congas and Shekeres, Pearl offers percussion accessories to complete the traditional Afro-Cuban line-up. The Cata is a bamboo instrument played with sticks, and comes with a mount that can be housed on any 3/8" rod. We have two Claves: A bamboo pair for a dry "airy" tone that is lower in pitch than our "Chin-Chan" hardwood claves. The Achere is a perfectly weighted single shaker with a handle used for time-keeping, while the Guataca, based off a gardening hoe, has scalloped edges for scraping with the included metal striker. The Guataca features a built-in mounting bracket that fits standard 3/8" posts for great metallic effects that will complement any percussion set or drum kit.

Folkloric Percussion

This Pearl line of Folkloric congas feature a traditional look with modern innovation that only Pearl can deliver. Each 28" tall Oak conga is designed for the "seated" player, but is pre-drilled for stand mounts if necessary. Thicker South American style natural skins makes the drums warm sounding, but a fiberglass gel coat on the interior seals the shell and adds the projection and volume desired by today's players. Four Polished Steel Reinforcing Bands are inset on the shell for a smooth touch, and the traditional hoops complete these stunning instruments in a Matte Crimson Sunrise finish. The 7 & 8 1/2" Oak Bongos have the same hardware and shell features of the congas. The thicker hoops skins add to the projection and "dry" tone reminiscent of that classic Cuban sound.

Ultra-Sound Snares

Pearl's Ultra-Sound snares feature patented Graduated Tension wires for extended dynamic range from ultra soft to ultra loud. Ultra-thin, low mass end plates assure ultra quick response. The end plates feature three mounting options: tunnels or holes for cord mounting and slots for straps.
