There are three radio button options: 'Activate my purchased version of Studio One' (selected), 'Try the full version for a time limited demo period', and 'Run Studio One Prime - the feature limited FREE version'. Plug your malletSTATION into your computer, and you should then be able to select a track on the left hand side, play the malletSTATION, and hear sounds. Depending on your audio device, you might need to set your latency lower in the Studio One options/preferences to reduce the delay between the time your mallet hits the bars and the time you hear the sound.
