

## D-3000TC TIMPANI THRONE

The New Pearl D3000-TC timpani Throne provides a new standard of stability and adjustability for the concert percussionist and anyone else needing a tall seating solution. The D3000TC features a heavy duty hydraulic-lift cylinder that allows the player to infinitely adjust the seat over a range from 23" to 33" tall. The padded seat is 17.75" wide and also includes a full size adjustable back rest for maximum user comfort over long periods.

The foot ring is also height adjustable over the entire length of the center cylinder height with a spin-lock system that requires no tools for adjustment. The solid cast 5-leg base provides a stable platform for players and features one height adjustable foot pad to accommodate for uneven surfaces.

This throne goes beyond the percussion section as a great upright double bass chair, synthesizer seat, and Conductors stool.
