

PL-900C

PERCUSSION LEARNING CENTER

Pearl has redesigned its Educational Percussion products for 2011 to maximize performance and value while minimizing weight and overall size. The all new PL900C combination Bell and Snare Percussion learning Center is the most compact Pearl Combination Ed Kit ever featuring a new 13" x 3.5" Poplar shell snare with a durable Concert Black wrap finish. The wood shell snare has a tone more like the world famous Pearl Philharmonic and Symphonic snare drums that educators and players alike prefer. The bell set is a full 2.5 octave f-c range instrument with aluminum bars to reduce weight, while still producing a pleasant tone for effective learning.

All the 900 Series Student Percussion cases have been redesigned for 2011 with updated styling features, additional and reinforced handles, added padding, and outside pockets for even more storage capacity. The PL900C case is ready for school use with a retractable tilt and pull handle, built-in wide-stance roller blade wheels, and comes loaded with additional accessories including stand with both bell mount and adjustable snare basket, tunable 8" practice pad, drum key, bell mallets, drum sticks, and wire music desk.
