

SK-900

SNARE KIT

Pearl has redesigned its Educational Percussion products for 2011 to maximize performance and value while minimizing weight and overall size. The redesigned SK900C Snare features a full size 14" x 5.5" Steel snare drum with a simple to use snare strainer and easy tunability. This drum is equally at home in the concert band, or on the drumset with both sensitivity and projection for both settings.

All the 900 Series Student Percussion cases have been redesigned for 2011 with updated styling features, additional and reinforced handles, added padding, and outside pockets for even more storage capacity. The PK900C case is ready for school use with a retractable tilt and pull handle, built-in wide-stance roller blade wheels, and comes loaded with additional accessories including stand with Quick release bell and pad mount, tunable 8" practice pad, drum key, bell mallets, drum sticks, and wire music desk.

Also available without wheels
in a backpack -style case:
